

r-Trio Max mop

All-rounder with maximized dirt removal

Product description

The new single sided flat mop r-Trio Max mop is significantly upgraded in functionality, durability and sustainability for professional cleaning application to enhance the performance of the floorcleaning systems UltraSpeed Pro, CombiSpeed Pro and Express Pro.

The mops are made from more than 35% recycled materials. The 4-yarn fibre construction ensures excellent cleaning performance, easy gliding and high durability. The mop is available for all 3 floor-cleaning systems in specific widths. r-Trio Max mops are perfect to clean areas up to 20 m² (40cm mop).

Application area

r-Trio Max mops are used and ideal in a multitude of environments such as general building cleaning sites, like office environments, residential properties and schools as well as in hotel and restaurants applications.

r-Trio Max mop is ideal to clean heavily soiled plain floor coverings and is a specialist on uneven floors as the mop-fringes reach into grooves in the surface to remove trapped dirt and loose particles such as hair, sand etc. Suitable for all cleaning methods from bucket and press, spray-cleaning as well as pre-prepared.

Adaptable gliding loop construction suits various floor surfaces, such as rubber, linoleum, vinyl and tiles.

Customer benefits

- ✓ Easy gliding loop construction adjusting to any hard floor surface
- ✓ Perfected 4-line cleaning zones:
 - Strong scrubbing zones to loosen trapped dirt
 - Microfibre zones for deep cleaning
 - Highly absorbent outer zones for excellent spill pick up, loose dirt and hairs
 - Low friction center zone for easy mop gliding
- ✓ Up to 99.9% Bovine coronavirus removal and up to 99.99% bacteria removal tested with P. aeruginosa & S. aureus both tested from vinyl surfaces at a 3rd party lab
- ✓ High wash durability up to 500 washes tested at internal lab with chemical-thermal disinfection at 60°C
- ✓ Made from more than 35% recycled materials
- ✓ Improved handling by optimized mop designs for easy frame attachment onto the mops
- ✓ Colour coded for identification and individual adaptation to hygiene systems
- ✓ Made in Europe

Washing recommendations

- ✓ Recommended washing conditions: 60 °C
- ✓ Maximum washing temperature: 95°C
- ✓ Avoid high alkalinity and strong bleaching activity (do not use chlorine bleach)
- ✓ Tumble dry at low heat

How to use

3 different mop executions suitable for bucket and press, spray-cleaning as well as pre-prepared method.
